# CBit 10

Everything you need

## CHISON Medical Technologies Co., Ltd.

Sales & Service Contact Address  
 No.9, Xinhuihuan Road, Xinwu District, Wuxi, Jiangsu, China 214028  
**TEL:** 0086-510-85310937  
**FAX:** 0086-510-85310726  
**EMAIL:** export@chison.com.cn

# Ergonomic design

## 13.3 inch HD touch panel

Superbly responsive  
Customizable interface  
Ergonomic tilting ensures all-dimensional,  
multi-angle visualization

23.8 inch Wide HD LED

Gel warmer

13.3 inch Touch screen

Height adjustable

Battery

Four probe connectors

# Expands the speciality

## Dual-Screen Display

Dual-screen display for better view: touch screen, main screen

Easy to slide

Finger-gesture to ZOOM in and ZOOM out

For convenient measurement ,rotation

# Highly Improved productivity

## SonoContrast

- An innovative technology.
- Higher sensitivity.
- Better contrast.
- Adapt to all probes: linear, convex, phased array, transvaginal.

## SonoNeedle

- Enhance the display of needle during puncture.
- Better performance than traditional needle enhance technology.
- No angle dependence.

## Color Panoramic imaging

- Enlarge the scanning area in real time, provide the more color information.
- Useful for the large vessel especially the upper extremity and low extremity.

## Intelligent Doppler

- Automatically adjust the ROI direction, PFR in color mode, doppler gate in PW mode.
- More efficient.
- Much easier to measure.
- Allow you to focus on patients better.

## Intelligent Focus

- Automatically optimize the focus position.
- Focus on the interesting area to improve the image.
- Efficient and intelligent.

## Raw Data

- Adjust the parameters after freeze (gain, TGC, dynamic) .
- Speedy the scanning time, save the processing time.
- Efficiency and fast .

## Intelligent-OB

- Intelligent software for OB, High efficiency and precise measurement tools.
- Automatically measure: BPD, HC, AC, FL, NT.
- One step to obtain the result.

## SonoCrystal

- To do prenatal diagnosis especially assess the spine, ribs and skin.
- Effective enough to differentiate soft tissue and bony structures.
- Give particular information on the contour of the ribs and enabled inference on mineralization.

## SonoColor

- Automatic measure the velocity of blood flow in C Mode.
- Provide quantitative flow analysis without spectrum.

# Better diagnostic confidence

Carotid, B Mode

Jugular Vein, B Mode

Kidney, C Mode

Left ventricular short axis, B Mode

Left ventricular long axis, B Mode

Thyroid, B Mode

MSK, B Mode

Vertebral Artery, B Mode

Fingertip blood flow, C Mode
